## IN THE CLAIMS:

Please delete claim 2.

Please amend claims 1, 2, 11, 21-23, and 35-36 to read as follows (See also Appendix A):

1. (Amended) A cationic aqueous hydrogel comprising an inherently

antimicrobial quaternary amine acrylate polymer having the formula:

wherein n is an integer of 2 to 3; R', R'' and R''' are independently selected from the group consisting of H,  $C_1$  to  $C_{16}$  alkyl, aryl, arylamine, alkylamine, alkaryl and aralkyl, X is selected from the group consisting of O and NH; Y' is an acceptable anionic counterion to the  $N^+$  of the quaternary amine and m is an integer greater than 50,000.

(Amended) A wound dressing comprising a cationic hydrogel containing from about 15 to 95 weight percent by weight of an inherently antimicrobial quaternary

amine acrylate polymer having the formula:

wherein n is an integer of 2 to 3; R', R" and R" are independently selected from the group consisting of H, C<sub>1</sub> to C<sub>16</sub> alkyl, aryl, arylamine, alkylamine, alkaryl and aralkyl; X is selected from the group consisting of O and NH; Y is an acceptable anionic counterion to the N<sup>+</sup> of the quaternary amine and m is an integer greater than 50,000.

2024. (Amended) A wound dressing according to Claim 14 wherein the hydrogel contains between about 61 and 90% by weight of said cationic quaternary amine acrylate polymer.

2122. (Amended) A wound dressing according to Claim 21 wherein the hydrogel contains between about 65 and 75% by weight of said cationic quaternary amine acrylate polymer.

O O

(Amended) A device for the dressing of wounds comprising a substrate having fixedly attached thereto a wound dressing comprising a cationic hydrogel containing from about 15 to 95 weight percent by weight of an inherently antimicrobial quaternary amine acrylate polymer having the formula:

H<sub>2</sub>C | n | + Y | m

wherein n is an integer of 2 to 3; R', R" and R" are independently selected from the group consisting of H, C<sub>1</sub> to C<sub>16</sub> alkyl, aryl, arylamine, alkylamine, alkaryl and aralkyl; X is selected from the group consisting of O and NH; Y is an acceptable anionic counterion to the N of the quaternary amine and m is an integer greater than 50,000.

34 35. (Amended) A device according to Claim 25 wherein the hydrogel contains between about 61 and 90% by weight of said cationic quaternary amine acrylate polymer.

37 36. (Amended) A device according to Claim 25 wherein the hydrogel contains

B
